

NEELESH MEENA

FULL-STACK SOFTWARE ENGINEER

Kota, Rajasthan, India | +91 7023488011
damrianeesh@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full-stack software engineer and **IIT (ISM) Dhanbad** graduate with 3.5 years of experience building agentic AI and API-driven products across React and Next.js frontends, Node.js APIs, data stores, and GCP environments. At Hushh.ai, owned the **Location Feature Agent** end to end, built **Agent Orchestra** for A2A workflows with MuleSoft, and delivered **Plaid, KYC, and NDA-based investor onboarding** for Hushh Tech, while contributing to API testing, monitoring, documentation, code and PR reviews, and cloud resource management.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, TypeScript, Vue.js, JavaScript, HTML5, CSS3, Redux, Tailwind CSS, Chakra UI, Bootstrap, SEO, GSAP, Framer Motion, CMS,

Backend, APIs & Data: Node.js, Python, REST APIs, API Documentation, Automated API Testing, Prisma, Supabase, Firebase, Firestore, MongoDB, MySQL, SQL, PostgreSQL, JWT

Cloud & Engineering: Google Cloud Platform (GCP), GCP Resource Management, Docker, CI/CD, Git, Code Reviews, API Monitoring, Postman, Production Debugging, Version Control, Figma, Responsive Design, UI developer, Web Design, Gamification, Playwright, Docusign

AI & Integrations: A2A Agent Workflows, OpenAI, Google API, LLM Product Integration, MuleSoft APIs, Plaid, Shopify, MCP, Apple Wallet, Pinecone, LiveKit, WebRTC, Socket.IO, Redis, FCM

PROFESSIONAL EXPERIENCE

Hushh.ai

Remote | Kirkland, Washington, USA

Full-Stack Software Engineer

Jan 2024 – Jun 2026

- Owned end-to-end development of the **Location Feature Agent** across Next.js, Python/FastAPI, PostgreSQL and Capacitor for web, iOS and Android.
- Built **privacy-by-design**, consent-controlled encrypted location-sharing and retention workflows, including **Check-In/SOS, Pick Me Up/Safe Arrival**, trusted-recipient permissions, global notifications, and native FCM deep links.
- Built **Agent Orchestra** for agent-to-agent (A2A) workflows and integrated MuleSoft APIs to orchestrate agent interactions and API-driven data exchange.
- Built **Vibe Search** discovery and filtering UX with responsive **Hushh Button SDK integration**; increased **SEO visibility by 85%** through server/client separation, metadata optimization, crawlable page structure, and automated sitemaps
- Developed and maintained backend and API integrations, documentation, automated tests, and monitoring checks; reduced **frontend bug-resolution time by 55%** through reusable components, structured debugging, code reviews, and release validation.
- Built Hushh Tech's **secure investor onboarding** using React, TypeScript, and Supabase, integrating **Plaid, KYC, NDA generation/signing, approval tracking with Docusign, and gated access**; improved onboarding completion by **40%** through a lower-friction UX.
- Owned performance and privacy implementation for Next.js web properties serving **3,000–4,000 daily visitors**; improved **Core Web Vitals by 35%** and implemented **GDPR-aligned cookie consent flows** with granular preferences, consent withdrawal, and conditional analytics.

Zero3 Inc.

Remote | Tokyo, Japan

Frontend Engineer (Freelance)

Aug 2024 – Dec 2024

- Delivered **35+ production-ready screens** across MA Spider, Proful, and Salesbond using reusable React, Next.js, and TypeScript components.
- Reduced the UI bug backlog by **70%**, resolved **67 issues**, and cut client feedback turnaround by **50%** while building onboarding flows, integrating APIs, and supporting Docker-based workflows.

Tryp.com

Remote | Denmark

Software Engineer

Oct 2023 – Jan 2024

- Built **11 React and Next.js screens** and improved booking-flow completion by **45%** across trip discovery, customization, and booking.
- Reduced frontend bugs by **80%** across trip-planning interfaces while integrating Mapbox and external API data flows.

Mailmodo

Remote | Bengaluru, India

Software Engineer

Feb 2023 – Oct 2023

- Built or improved **17 React and Next.js screens** and resolved **88 frontend issues** across the web app, MM-Admin, and Workflow & Experience modules.
- Improved admin efficiency by **35%** and reduced workflow UI bugs by **40%** through API-driven interfaces, responsive updates, and production debugging.

ADDITIONAL EXPERIENCE

Software Engineer (Part-Time) | Yahshua: Built HRIS and job-posting workflows from Figma using Next.js, Redux, and Node.js, including state management and API integration.

Web Developer | Student Gymkhana, IIT (ISM): Built admin and student portals plus REST APIs for campus voting, notices, and results.

SELECTED PROJECTS

E-Commerce Platform | Angular, TypeScript, Node.js: Built responsive authentication, product browsing, checkout, and billing workflows.

Customer Tracking System | Angular, TypeScript, Firebase: Built CRUD workflows for registration, customer records, and task management.

EDUCATION

Indian Institute of Technology (ISM), Dhanbad | B.Tech, Environmental Engineering | Jul 2019 - May 2023 | Top 2% IIT-JEE
